

Smart XL hydraulic press brake

Référence interne :

CARACTERISTIQUES:

- Precise and high-quality bending.
- Reinforced structure with stress reduction.
- Increased throat depth (400 mm to 600 mm depending on tonnage).
- Extended stroke range (300 mm to 455 mm) based on tonnage and bending length.
- Wider opening (530 mm to 680 mm) depending on tonnage and bending length.
- Reinforced hydraulic system with internal gear pump for faster and quieter operation.
- Permanent ram guidance via 4 contact points.
- Standard PROMECAM/AMADA tool holder.
- ESA S 640 CNC controller with a 15" 2D touchscreen and 3D visualization.
- High-quality hydraulic components.
- Easy maintenance and servicing.
