

Hawx

Référence interne :

CARACTERISTIQUES:

Breton's HAWX delivers exceptional precision and stability with its monolithic structure and compact design for optimized space usage. It supports dry and wet machining, featuring advanced protections against dust and liquids. Equipped with a dual safety system and anti-collision technology, it minimizes errors. Its energy-efficient design reduces maintenance costs and enhances operational efficiency. Reliability is ensured through high-quality components and a responsive support service, maximizing machine availability and performance.
