

Eagle

Référence interne :

CARACTERISTIQUES:

Breton Eagle is a modular and versatile machining center designed for diverse applications, offering numerous options such as ultrasonic cutting and thickness control. Its adjustable dimensions include vertical strokes up to 2.5 m and column extensions exceeding 12 m. Engineered for wet or dry machining, it incorporates advanced protections against contaminants. The thermosymmetric design enhances thermal management, while the Hornet and Ghibli heads deliver performance tailored to precision and power requirements.
