

Matrix E3

Référence interne :

CARACTERISTIQUES:

The Matrix E3 combines strength, speed, and precision with Dual Drive motors and advanced measurement systems. Its thermosymmetric structure with Thermal Shield minimizes deformations and operational costs. Designed for optimal ergonomics, it features an accessible table, enclosed machining area, and excellent visibility. Connected to Industry 4.0, it supports predictive maintenance and performance analysis. Available in two sizes with customizable options, it meets the needs of industries like aerospace and mold-making, offering advanced technologies such as ultrasonic cutting and automated taper machining.
